NPL Services for Examiners

Wednesday, February 16, 2005

STIC's mission is to connect examiners to critical prior art by providing information services and access to NPL electronic resources and print collections. A STIC facility is located in each Technology Center.

Most of the electronic resources listed on this site are accessed via the Internet. **Please obey USPTO "Rules of the Road (PDF Text)" when using Internet resources.**

Internet Security

Wednesday, February 16, 2005

These resources and services provide examiners with access to critical prior art. Most of the electronic resources listed on this page are accessed via the Internet. **Please obey USPTO "Rules of the Road (PDF Text)" when using Internet resources.**

➪ indicates tools featured in TC's NPL training.

Information Resources

Information Resources by Class and Subclass

Databases

➪ ACM Digital Library
Business Source Corporate
(Multidisciplinary subject coverage)
Dialog Classic on the Web
(Training and password required.)
DTIC STINET
(Citations of Defense Technical Information Center scientific and technical documents)
EEDD Submission Form
Examiners' Electronic Digest Database (EEDD)
(Database of examiner submitted NPL)
GrayLIT Network
(Multidisciplinary database of scientific and technical information from DTIC, NASA, DOE, and EPA)

➪ IEEE Xplore
(Full page images of over 800,000 Electrical & Electronic Engineering articles, papers and standards, 1988 - present. Select content is available from 1952-1987.)
IEEE Xplore Tutorial
INSPEC
(Seven million well-indexed physics, EE, and IT abstracts, 1969-present)
IP.com
(Defensive disclosures published to the Disclosures IP.com database from various websites)
NTIS (National Technical Information Service)
(resource for government-funded scientific, technical, engineering, and business related information)
ProQuest Digital Dissertations
Proquest Direct
(Multidisciplinary subject coverage)
Research Disclosure
(Published monthly as a paper journal and now as an online database product with advanced full

text searching capabilities for defensive disclosure information.)

ScienceDirect [Search Guide]
(scientific, technical, and medical journals)

Software Patent Institute (SPI) (Select "Free Access")
(Searchable database of Software Technologies.)

SPIE Digital Library
(journals and proceedings on optics and photonics)

STN on the Web (training and password required)
(The other link is via the Patent Examiner's Toolkit. On your computer, click on the START button, then on the PE Toolkit, then on STN Express.)

True Query
(A resurrected version of the old "Computer Select" database, providing full text access to over 100 technology focused publications, a glossary of technical terms, product reviews and over 60,000 product specifications from 1999 to the present. If html code appears on your screen, click browser's "Reload" or "Refresh" button.)

Books and Journals

Search STIC Online Catalog
InfoSECURITYnetBASE
(Information security)
Knovel
(Applied science and engineering)
NetLibrary.com
(Multidisciplinary subject coverage)
Safari Online Books
(Computer and information technology)
Springer Publishing Company
(biotech, physics, and computer journals)

Daily Newspapers

Fulltext newspaper articles are available electronically in Proquest Direct.

CD-ROM Resources

Older full text NPL resources/articles received in CD-Rom format. These resources are available on EIC2100 PCs in CPK2, 4B40.

Equipment

Fax (571-273-0044)
Optical Scanners
- Use OmniPage Pro software to scan your documents.

Power Mac G3
Photocopier

Reference Tools

Bartleby.com
(Several versions of Roget's Thesaurus, a dictionary, an encyclopedia, quotations, English usage books and more.)

Computer References
(Dictionaries, Acronyms Finders, Encyclopedias)

Efunda
(30,000 pages of engineering fundamentals and calculators)

Encyclopedia Britannica
Encyclopedia of Software Engineering
Eric Weisstein's World of Mathematics
(A comprehensive online encyclopedia of mathematics.)

HowStuffWorks

(Search a term to find articles that explain how it works.)
The Internet Encyclopedia
Over 2000 Glossary Links
(Links to numerous technical, specialty, and general glossaries.)
PCWebopedia
Wiley Encyclopedia of Electrical and Electronics Engineering
Xreferplus
Yourdictionary.com
(Numerous "specialty dictionaries"... technological, law, business related and more.)

[e-submit] [Printable form]
Fast & Focused Search Criteria
STIC Online Catalog
Translation Services

Web Resources

A Brief History of the Hard Disk Drive
CiteSeer (ResearchIndex)
(Full text scientific research papers - in pdf and postscript formats.)
Interfacebus.com
(Listing of Electronic Interface Buses with links to standards and specifications.)
Internet Engineering Task Force
(The IETF Secretariat, run by The Corporation for National Research Initiatives with funding from the US government, maintains an index of Internet-Drafts.)
Nanotechnology
PCI Specifications (username: uspto; password: pat222)
("Peripheral Component Interconnect" specifications and white papers.)
Requests for Comments (RFCs) Database
(Requests for Comments (RFC) document series is a set of technical and organizational notes about the Internet (originally the ARPANET), beginning in 1969 and discussing many aspects of computer networking, including protocols, procedures and concepts as well as meeting notes and opinions.)
Scirus
Usenet Archive (Google Groups)
Wayback Machine
(Archived web pages.)

New Look, New Features: **IEEE *Xplore*® 2.0** COMING SOON!

IEEE *Xplore* provides full-text access to IEEE transactions, journals, magazines and conference proceedings published since 1988 plus select content back to 1950, and all current IEEE Standards.

FREE TO ALL: Browse tables of contents and access Abstract records of IEEE transactions, journals, magazines, conference proceedings and standards.

IEEE MEMBERS: Browse or search to access any complete Abstract record as well as articles from IEEE Spectrum Magazine. Access your personal online subscriptions using your active IEEE Web Account. If you do not have one, go to "Establish IEEE Web Account" to set up an account.

CORPORATE, GOVERNMENT AND UNIVERSITY SUBSCRIBERS: Search and access complete Abstract records and full-text documents of the IEEE online publications to which your institution subscribes.

Help

1) Enter a single keyword, phrase, or Boolean expression.
Example: acoustic imaging (means the phrase acoustic imaging plus any stem variations)
2) Limit your search by using search operators and field codes, if desired.
Example: optical <and> (fiber <or> fibre) <in> ti
3) Limit the results by selecting Search Options.
4) Click Search. See Search Examples

(medical<near>cost)

Start Search Clear

Note: This function returns plural and suffixed forms of the keyword(s).

Search operators: <and> <or> <not> <in> More

Field codes: au (author), ti (title), ab (abstract), jn (publication name), de (index term) More

Search Options:

Select publication types:

- [x] IEEE Journals
- [x] IEE Journals
- [x] IEEE Conference proceedings
- [x] IEE Conference proceedings
- [x] IEEE Standards

Select years to search:

JNL = Journal or Magazine **CNF** = Conference **STD** = Standard

1 **Healthwear: medical technology becomes wearable**
Pentland, A.;
Computer , Volume: 37 , Issue: 5 , May 2004
Pages:42 - 49

[Abstract] [PDF Full-Text (1044 KB)] IEEE JNL

2 **A new research challenge: persuasive technology to motivate healtl aging**
Intille, S.S.;
Information Technology in Biomedicine, IEEE Transactions on , Volume: 8 , Is 3 , Sept. 2004
Pages:235 - 237

[Abstract] [PDF Full-Text (64 KB)] IEEE JNL

3 **Economic implications of health care policy for medical technology**
Doherty, N.J.G.;
Technology and Society Magazine, IEEE , Volume: 7 , Issue: 2 , June 1988
Pages:18 - 23

[Abstract] [PDF Full-Text (636 KB)] IEEE JNL

4 **Can technology reduce health care costs?**
Wells, P.N.T.;
Engineering Management Journal , Volume: 12 , Issue: 4 , Aug. 2002
Pages:194 - 200

[Abstract] [PDF Full-Text (976 KB)] IEE JNL

5 **Robust regression under asymmetric or/and non-constant variance by simultaneously training conditional quantiles**
Takeuchi, I.; Yamanaka, N.; Furuhashi, T.;
Neural Networks, 2003. Proceedings of the International Joint Conference on , Volume: 3 , 20-24 July 2003
Pages:1729 - 1734 vol.3

[Abstract] [PDF Full-Text (464 KB)] IEEE CNF

---

6 **The long-term adoption of speech recognition in medical application**
Grasso, M.A.;
Computer-Based Medical Systems, 2003. Proceedings. 16th IEEE Symposium 27 June 2003
Pages:257 - 262

[Abstract] [PDF Full-Text (220 KB)] IEEE CNF

---

7 **The study of medical costs with intelligent information systems**
Riano, D.; Prado, S.;
Computer-Based Medical Systems, 2002. (CBMS 2002). Proceedings of the 15 IEEE Symposium on , 4-7 June 2002
Pages:343 - 346

[Abstract] [PDF Full-Text (274 KB)] IEEE CNF

---

8 **Introduction of new medical technologies: an international and ethi perspective**
Saha, S.; Saha, P.S.;
Engineering in Medicine and Biology Society, 1998. Proceedings of the 20th A International Conference of the IEEE , Volume: 6 , 29 Oct.-1 Nov. 1998
Pages:3357 - 3358 vol.6

[Abstract] [PDF Full-Text (188 KB)] IEEE CNF

---

9 **A paradigm shift in systems thinking for diagnostic imaging**
Wickizer, B.;
Computer-Based Medical Systems, 1998. Proceedings. 11th IEEE Symposium on , 12-14 June 1998
Pages:55 - 59

[Abstract] [PDF Full-Text (116 KB)] IEEE CNF

---

10 **Cardiac defibrillation**
Smith, W.M.;
Engineering in Medicine and Biology Society, 1995. IEEE 17th Annual Conference , Volume: 1 , 20-23 Sept. 1995
Pages:249 - 250 vol.1

[Abstract] [PDF Full-Text (272 KB)] IEEE CNF

---

11 **Visual fidelity of reconstructed radiographic images using wavelet transform coding and JPEG**
Muyshondt, R.A.; Mitra, S.;

Computer-Based Medical Systems, 1995., Proceedings of the Eighth IEEE Symposium on , 9-10 June 1995
Pages:196 - 203

[Abstract] [PDF Full-Text (412 KB)] **IEEE CNF**

---

12 **Development of a low-cost medical image processing system**
Ying Jun Zhao; Jia Rui Lin;
Engineering in Medicine and Biology Society, 1988. Proceedings of the Annual International Conference of the IEEE , 4-7 Nov. 1988
Pages:495 - 496 vol.1

[Abstract] [PDF Full-Text (140 KB)] **IEEE CNF**

---

13 **PhiSAS: a low-cost medical system for the observation of respirato dysfunction**
Brown, A.S.; Harvey, D.M.; Jamieson, G.; Graham, D.R.;
Appropriate Medical Technology for Developing Countries (Ref. No. 2002/057) Seminar on , 6 Feb. 2002
Pages:10/1 - 10/5

[Abstract] [PDF Full-Text (495 KB)] **IEE CNF**

---

14 **Technology in medicine: too much too soon?**
Fitzgerald, K.;
Spectrum, IEEE , Volume: 26 , Issue: 12 , Dec. 1989
Pages:24 - 29

[Abstract] [PDF Full-Text (824 KB)] **IEEE JNL**

---

15 **Risk management [medical devices]**
Bartoo, G.;

Nothing Found

Your search for **((medical<near>cost)<and>(training<near>data))** did not return any results.

You may want to try an Advanced Search for additional options.

Please review the Quick Tips below or for more information see the Search Tips.

Quick Tips

- Enter your search terms in lower case with a space between the terms.

  ```
  sales offices
  ```

  You can also enter a full question or concept in plain language.

  ```
  Where are the sales offices?
  ```

- Capitalize proper nouns to search for specific people, places, or products.

  ```
  John Colter, Netscape Navigator
  ```

- Enclose a phrase in double quotes to search for that exact phrase.

  ```
  "museum of natural history" "museum of modern art"
  ```

- Narrow your searches by using a + if a search term must appear on a page.

  ```
  museum +art
  ```

- Exclude pages by using a - if a search term must not appear on a page.

  ```
  museum -Paris
  ```

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

```
museum +"natural history" dinosaur -Chicago
```

1 Computing applications III: medical: An analysis of the job market for biomedical computer scientists

Fred R. Sias

April 1976 **Proceedings of the 14th annual Southeast regional conference**

Full text available: pdf(367.74 KB) Additional Information: full citation, abstract, references, citings

Biomedical Information and Computer Science is an academic area that has received much interest recently. A number of training programs have been developed around the country. This paper is an examination of the potential market for biomedical information and computer scientists.It is possible to identify a number of organizations that may potentially employ biomedical computer scientists. Included in such a list are medical schools, hospitals above a certain size, software houses, health mainte ...

2 Decision trees with minimal costs

Charles X. Ling, Qiang Yang, Jianning Wang, Shichao Zhang

July 2004 **Twenty-first international conference on Machine learning**

Full text available: pdf(306.59 KB) Additional Information: full citation, abstract, references

We propose a simple, novel and yet effective method for building and testing decision trees that minimizes the sum of the misclassification and test costs. More specifically, we first put forward an original and simple splitting criterion for attribute selection in tree building. Our tree-building algorithm has many desirable properties for a cost-sensitive learning system that must account for both types of costs. Then, assuming that the test cases may have a large number of missing values, we ...

3 6-2 VRC in simulation & training: Multidimensional volume visualization for PC-based microsurgical simulation system

Zhenlan Wang, Chee-Kong Chui, Yiyu Cai, Chuan-Heng Ang

June 2004 **Proceedings of the 2004 ACM SIGGRAPH international conference on Virtual Reality continuum and its applications in industry**

Full text available: pdf(446.38 KB) Additional Information: full citation, abstract, references, index terms

Microsurgery is a highly complex surgical procedure on small body parts performed by a dedicated surgical team. An operating microscope is typically used to obtain a precise view of the soft tissues. The complexity of the microsurgical procedure makes it a suitable application of virtual/augmented reality technology for training purpose. In this paper, we present an overview of our simulator and then describe the visualization work that reconstructs the magnified view of the operating area from ...

Keywords: LLO/DLLO, microsurgery, simulation, visualization, volume rendering

4 Learning methods to combine linguistic indicators: improving aspectual classification and revealing linguistic insights

Eric V. Siegel, Kathleen R. McKeown

December 2000 **Computational Linguistics**, Volume 26 Issue 4

Full text available: pdf(1.96 MB) Publisher Site Additional Information: full citation, abstract, references

Aspectual classification maps verbs to a small set of primitive categories in order to reason about time. This classification is necessary for interpreting temporal modifiers and assessing temporal relationships, and is therefore a required component for many natural language applications.A verb's aspectual category can be predicted by co-occurrence frequencies between the verb and certain linguistic modifiers. These frequency measures, called linguistic indicators, are chosen by linguistic insi ...

5 Special issue on learning from imbalanced datasets: Minority report in fraud detection: classification of skewed data

Clifton Phua, Damminda Alahakoon, Vincent Lee

June 2004 **ACM SIGKDD Explorations Newsletter**, Volume 6 Issue 1

Full text available: pdf(262.38 KB) Additional Information: full citation, abstract, references, citings

This paper proposes an innovative fraud detection method, built upon existing fraud detection research and *Minority Report*, to deal with the data mining problem of skewed data distributions. This method uses backpropagation (BP), together with naive Bayesian (NB) and C4.5 algorithms, on data partitions derived from minority oversampling with replacement. Its originality lies in the use of a single meta-classifier (stacking) to choose the best base classifiers, and then combine these base ...

Keywords: fraud detection, meta-learning, multiple classifier systems

6 Cost/benefit based adaptive dialog: case study using empirical medical practice norms and intelligent split menus

Jim Warren

January 2001 **Australian Computer Science Communications , Proceedings of the 2nd Australasian conference on User interface**, Volume 23 Issue 5

Full text available: pdf(843.80 KB) Publisher Site Additional Information: full citation, abstract, references, citings, index terms, review

The notion of an adaptive user interface, one that accommodates user needs based on knowledge of the task at hand, is compelling but difficult to make practical. This paper examines models of the utility (as balancing of cost and benefit) in the initiation of task-specific dialog based on conditional probability of user goals in context. Illustrations in this paper are based on an empirical model of General Practice (GP) medicine as derived from a large database of GP/patient encounters. Applica ...

7 Examining alternative End-Stage Renal Disease (ESRD) therapies through simulation

Stephen D. Roberts, Thomas L. Gross, Douglas R. Maxwell

March 1979 **Proceedings of the 12th annual symposium on Simulation**

Full text available: pdf(1.04 MB) Additional Information: full citation, abstract, references, index terms

To examine the costs and effects of alternative treatments for End-Stage Renal Disease

(ESRD), we constructed a simulation model which estimates patient survival and lifetime cost for those with ESRD. The model, written in the INS simulation language, considers home and center hemodialysis as well as live related and cadaver donor transplantation. After the model was validated, the cost per life year gained for each therapy was computed. Center hemodialysis was found to have the poorest cos ...

8 98¢/Mflops/s ultra-large-scale neural-network training on a pIII cluster

Douglas A. Aberdeen, Jonathan Baxter, Robert Edwards

November 2000 **Proceedings of the 2000 ACM/IEEE conference on Supercomputing (CDROM)**

Full text available: pdf(215.33 KB) Publisher Site Additional Information: full citation, abstract, references, citings, index terms

Artificial neural networks with millions of adjustable parameters and a similar number of training examples are a potential solution for difficult, large-scale pattern recognition problems in areas such as speech and face recognition, classification of large volumes of web data and finance. The bottleneck is that neural network training involves iterative gradient descent and is extremely computationally intensive. In this paper we present a technique for distributed training of Ultra Large ...

Keywords: neural-network, Linux cluster, matrix-multiply

9 May I interrupt?: BusyBody: creating and fielding personalized models of the cost of interruption

Eric Horvitz, Paul Koch, Johnson Apacible

November 2004 **Proceedings of the 2004 ACM conference on Computer supported cooperative work**

Full text available: pdf(145.02 KB) Additional Information: full citation, abstract, references, index terms

Interest has been growing in opportunities to build and deploy statistical models that can infer a computer user's current interruptability from computer activity and relevant contextual information. We describe a system that intermittently asks users to assess their perceived interruptability during a training phase and that builds decision-theoretic models with the ability to predict the cost of interrupting the user. The models are used at run-time to compute the expected cost of interrupt ...

Keywords: cost of interruption, models of attention, notification systems

10 Man-machine communications in the biological-medical research environment

William E. Farley, Alfred H. Pulido, Tate M. Minckler, Lee D. Cady

January 1966 **Proceedings of the 1966 21st national conference**

Full text available: pdf(297.42 KB) Additional Information: full citation, abstract, references, index terms

The key source of raw data in most biomedical research is the patient's medical record. The hospital patient medical record is most commonly thought of as the repository for all pertinent facts relating to laboratory test results, diagnostic conclusions, treatment procedures, and observations. Depending on the nature of the patient's complaint, there are varying amounts of medical history information incorporated into the record. In many instances, the compilation of the record has become s ...

11 On becoming virtual: the driving forces and arrangements

Magid Igbaria, Conrad Shayo, Lorne Olfman

April 1999 **Proceedings of the 1999 ACM SIGCPR conference on Computer personnel research**

Full text available: pdf(1.80 MB) Additional Information: full citation, references, index terms

Keywords: telework, virtual communities, virtual organizations, virtual society, virtual teams

12 Special issue on learning from imbalanced datasets: Mining with rarity: a unifying framework

Gary M. Weiss
June 2004 **ACM SIGKDD Explorations Newsletter**, Volume 6 Issue 1

Full text available: pdf(182.31 KB) Additional Information: full citation, abstract, references, citings

Rare objects are often of great interest and great value. Until recently, however, rarity has not received much attention in the context of data mining. Now, as increasingly complex real-world problems are addressed, rarity, and the related problem of imbalanced data, are taking center stage. This article discusses the role that rare classes and rare cases play in data mining. The problems that can result from these two forms of rarity are described in detail, as are methods for addressing these ...

Keywords: class imbalance, cost-sensitive learning, inductive bias, rare cases, rare classes, sampling, small disjuncts

13 Turmoil at NASA, and numerous funding announcements

Xiaolei Qian
September 1995 **ACM SIGMOD Record**, Volume 24 Issue 3

Full text available: pdf(115.95 KB) Additional Information: full citation, abstract, index terms

Since the last issue of this column six months ago, there have been many interesting program announcements, some of which have already passed deadline. We'll go over these announcements anyway, with the hope that they can get the readers better prepared for future funding opportunities. But first, we'll talk about the continuing budget battle at Congress, and the recent turmoil at NASA.

1 Special issue on learning from imbalanced datasets: A study of the behavior of several methods for balancing machine learning training data

Gustavo E. A. P. A. Batista, Ronaldo C. Prati, Maria Carolina Monard

June 2004 **ACM SIGKDD Explorations Newsletter**, Volume 6 Issue 1

Full text available: pdf(314.77 KB) Additional Information: full citation, abstract, references, citings

There are several aspects that might influence the performance achieved by existing learning systems. It has been reported that one of these aspects is related to class imbalance in which examples in training data belonging to one class heavily outnumber the examples in the other class. In this situation, which is found in real world data describing an infrequent but important event, the learning system may have difficulties to learn the concept related to the minority class. In this work we per ...

2 Cost/benefit based adaptive dialog: case study using empirical medical practice norms and intelligent split menus

Jim Warren

January 2001 **Australian Computer Science Communications , Proceedings of the 2nd Australasian conference on User interface**, Volume 23 Issue 5

Full text available: pdf(843.80 KB) Publisher Site Additional Information: full citation, abstract, references, citings, index terms, review

The notion of an adaptive user interface, one that accommodates user needs based on knowledge of the task at hand, is compelling but difficult to make practical. This paper examines models of the utility (as balancing of cost and benefit) in the initiation of task-specific dialog based on conditional probability of user goals in context. Illustrations in this paper are based on an empirical model of General Practice (GP) medicine as derived from a large database of GP/patient encounters. Applica ...

3 Special section on data mining for intrusion detection and threat analysis: Data mining-based intrusion detectors: an overview of the columbia IDS project

Salvatore J. Stolfo, Wenke Lee, Philip K. Chan, Wei Fan, Eleazar Eskin

December 2001 **ACM SIGMOD Record**, Volume 30 Issue 4

Full text available: pdf(1.05 MB) Additional Information: full citation, references, citings, index terms

4 Special issue on learning from imbalanced datasets: Minority report in fraud detection:

classification of skewed data
Clifton Phua, Damminda Alahakoon, Vincent Lee
June 2004 **ACM SIGKDD Explorations Newsletter**, Volume 6 Issue 1

Full text available: pdf(262.38 KB) Additional Information: full citation, abstract, references, citings

This paper proposes an innovative fraud detection method, built upon existing fraud detection research and *Minority Report*, to deal with the data mining problem of skewed data distributions. This method uses backpropagation (BP), together with naive Bayesian (NB) and C4.5 algorithms, on data partitions derived from minority oversampling with replacement. Its originality lies in the use of a single meta-classifier (stacking) to choose the best base classifiers, and then combine these base ...

Keywords: fraud detection, meta-learning, multiple classifier systems

5 Image and video digital libraries: Semantic video classification and feature subset selection under context and concept uncertainty
Jianping Fan, Hangzai Luo, Jing Xiao, Lide Wu
June 2004

Full text available: pdf(258.04 KB) Additional Information: full citation, abstract, references, index terms

As large collections of videos become one key component of digital libraries, there is an urgent need of semantic video classification and feature subset selection to enable more effective video database organization and retrieval. However, most existing techniques for classifier training require a large number of labeled samples to learn correctly and suffer from the problems of context and concept uncertainty when only a limited number of labeled samples are available. To address the problems ...

Keywords: adaptive EM algorithm, context and concept uncertainty, semantic video classification, unlabeled samples

6 A Bayesian decision model for cost optimal record matching
V. S. Verykios, G. V. Moustakides, M. G. Elfeky
May 2003 **The VLDB Journal — The International Journal on Very Large Data Bases**, Volume 12 Issue 1

Full text available: pdf(180.87 KB) Additional Information: full citation, abstract, index terms

In an error-free system with perfectly clean data, the construction of a global view of the data consists of linking - in relational terms, joining - two or more tables on their key fields. Unfortunately, most of the time, these data are neither carefully controlled for quality nor necessarily defined commonly across different data sources. As a result, the creation of such a global data view resorts to approximate joins. In this paper, an optimal solution is proposed for the matching or the lin ...

Keywords: Cost optimal statistical model, Data cleaning, Record linkage

7 Rule-based machine learning of spatial data concepts
Steve Stearns, Daniel C. St. Clair
February 1995 **Proceedings of the 1995 ACM symposium on Applied computing**

Full text available: pdf(730.02 KB) Additional Information: full citation, references, index terms

Keywords: AQ15, classification, expert systems, geographic information systems, machine learning

8 Special issue on learning from imbalanced datasets: Mining with rarity: a unifying framework

Gary M. Weiss

June 2004 **ACM SIGKDD Explorations Newsletter**, Volume 6 Issue 1

Full text available: pdf(182.31 KB) Additional Information: full citation, abstract, references, citings

Rare objects are often of great interest and great value. Until recently, however, rarity has not received much attention in the context of data mining. Now, as increasingly complex real-world problems are addressed, rarity, and the related problem of imbalanced data, are taking center stage. This article discusses the role that rare classes and rare cases play in data mining. The problems that can result from these two forms of rarity are described in detail, as are methods for addressing these ...

Keywords: class imbalance, cost-sensitive learning, inductive bias, rare cases, rare classes, sampling, small disjuncts

9 Data transformation and duplicate detection: A generalized cost optimal decision model for record matching

Vassilios S. Verykios, George V. Moustakides

June 2004 **Proceedings of the 2004 international workshop on Information quality in information systems**

Full text available: pdf(118.81 KB) Additional Information: full citation, abstract, references

Record (or entity) matching or linkage is the process of identifying records in one or more data sources, that refer to the same real world entity or object. In record linkage, the ultimate goal of a decision model is to provide the decision maker with a tool for making decisions upon the actual matching status of a pair of records (i.e., documents, events, persons, cases, etc.). Existing models of record linkage rely on decision rules that minimize the probability of subjecting a case to cleric ...

Keywords: probabilistic decision model, record matching

10 Special issue on the fusion of domain knowledge with data for decision support: Preference elicitation via theory refinement

Peter Haddawy, Vu Ha, Angelo Restificar, Benjamin Geisler, John Miyamoto

December 2003 **The Journal of Machine Learning Research**, Volume 4

Full text available: pdf(150.88 KB) Additional Information: full citation, abstract, references, citings, index terms

We present an approach to elicitation of user preference models in which assumptions can be used to guide but not constrain the elicitation process. We demonstrate that when domain knowledge is available, even in the form of weak and somewhat inaccurate assumptions, significantly less data is required to build an accurate model of user preferences than when no domain knowledge is provided. This approach is based on the KBANN (Knowledge-Based Artificial Neural Network) algorithm pioneered by Shav ...

11 Automated learning of decision rules for text categorization

Chidanand Apté, Fred Damerau, Sholom M. Weiss

July 1994 **ACM Transactions on Information Systems (TOIS)**, Volume 12 Issue 3

Full text available: pdf(1.28 MB) Additional Information: full citation, abstract, references, citings, index terms, review

We describe the results of extensive experiments using optimized rule-based induction methods on large document collections. The goal of these methods is to discover automatically classification patterns that can be used for general document categorization or personalized filtering of free text. Previous reports indicate that human-engineered rule-based systems, requiring many man-years of developmental efforts, have been successfully built to "read" documents and assign topics ...

12 A hierarchical access control model for video database systems

Elisa Bertino, Jianping Fan, Elena Ferrari, Mohand-Said Hacid, Ahmed K. Elmagarmid, Xingquan Zhu

April 2003 **ACM Transactions on Information Systems (TOIS)**, Volume 21 Issue 2

Full text available: pdf(6.27 MB) Additional Information: full citation, abstract, references, index terms

Content-based video database access control is becoming very important, but it depends on the progresses of the following related research issues: (a) efficient video analysis for supporting semantic visual concept representation; (b) effective video database indexing structure; (c) the development of suitable video database models; and (d) the development of access control models tailored to the characteristics of video data. In this paper, we propose a novel approach to support multilevel acce ...

Keywords: Video database models, access control, indexing schemes

13 QProber: A system for automatic classification of hidden-Web databases

Luis Gravano, Panagiotis G. Ipeirotis, Mehran Sahami

January 2003 **ACM Transactions on Information Systems (TOIS)**, Volume 21 Issue 1

Full text available: pdf(3.62 MB) Additional Information: full citation, abstract, references, index terms

The contents of many valuable Web-accessible databases are only available through search interfaces and are hence invisible to traditional Web "crawlers." Recently, commercial Web sites have started to manually organize Web-accessible databases into Yahoo!-like hierarchical classification schemes. Here we introduce QProber, a modular system that automates this classification process by using a small number of query probes, generated by document classifiers. QProber can use a variety of types of ...

Keywords: Database classification, Web databases, hidden Web

14 A review of vessel extraction techniques and algorithms

Cemil Kirbas, Francis Quek

June 2004 **ACM Computing Surveys (CSUR)**, Volume 36 Issue 2

Full text available: pdf(8.06 MB) Additional Information: full citation, abstract, references, index terms

Vessel segmentation algorithms are the critical components of circulatory blood vessel analysis systems. We present a survey of vessel extraction techniques and algorithms. We put the various vessel extraction approaches and techniques in perspective by means of a classification of the existing research. While we have mainly targeted the extraction of blood vessels, neurosvascular structure in particular, we have also reviewed some of the segmentation methods for the tubular objects that show ...

Keywords: Magnetic resonance angiography, X-ray angiography, medical imaging, neurovascular, vessel extraction

15 Improving SVM accuracy by training on auxiliary data sources

Pengcheng Wu, Thomas G. Dietterich

July 2004 **Twenty-first international conference on Machine learning**

Full text available: pdf(263.65 KB) Additional Information: full citation, abstract, references

The standard model of supervised learning assumes that training and test data are drawn from the same underlying distribution. This paper explores an application in which a second, auxiliary, source of data is available drawn from a different distribution. This auxiliary data is more plentiful, but of significantly lower quality, than the training and test data. In the SVM framework, a training example has two roles: (a) as a data point to constrain the learning process and (b) as a candidate su ...

16 Applications of machine learning and rule induction

Pat Langley, Herbert A. Simon

November 1995 **Communications of the ACM**, Volume 38 Issue 11

Full text available: pdf(554.28 KB) Additional Information: full citation, abstract, references, citings, index terms, review

Machine learning is the study of computational methods for improving performance by mechanizing the acquisition of knowledge from experience. Expert performance requires much domain-specific knowledge, and knowledge engineering has produced hundreds of AI expert systems that are now used regularly in industry. Machine learning aims to provide increasing levels of automation in the knowledge engineering process, replacing much time-consuming human activity with automatic tec ...

17 Industrial/government track: Clinical and financial outcomes analysis with existing hospital patient records

R. Bharat Rao, Sathyakama Sandilya, Radu Stefan Niculescu, Colin Germond, Harsha Rao

August 2003 **Proceedings of the ninth ACM SIGKDD international conference on Knowledge discovery and data mining**

Full text available: pdf(188.40 KB) Additional Information: full citation, abstract, references, index terms

Existing patient records are a valuable resource for automated outcomes analysis and knowledge discovery. However, key clinical data in these records is typically recorded in unstructured form as free text and images, and most structured clinical information is poorly organized. Time-consuming interpretation and analysis is required to convert these records into structured clinical data. Thus, only a tiny fraction of this resource is utilized. We present REMIND, a Bayesian Framework for Reliable ...

Keywords: Bayes Nets, HMMs, data mining, temporal reasoning

18 Fuzzy rule extraction from GIS data with a neural fuzzy system for decision making

Ding Zheng, Wolfgang Kainz

November 1999 **Proceedings of the 7th ACM international symposium on Advances in geographic information systems**

Full text available: pdf(1.07 MB) Additional Information: full citation, references, index terms

Keywords: GIS, decision-making, fuzzy rule inference, neural network

19 Privacy of medical records: IT implications of HIPAA

David Baumer, Julia Brande Earp, Fay Cobb Payton

December 2000 **ACM SIGCAS Computers and Society**, Volume 30 Issue 4

Full text available: pdf(819.71 KB) Additional Information: full citation, abstract

Increasingly, medical records are being stored in computer databases that allow for

efficiencies in providing treatment and in the processing of clinical and financial services. Computerization of medical records has also diminished patient privacy and, in particular, has increased the potential for misuse, especially in the form of nonconsensual secondary use of personally identifiable records. Organizations that store and use medical records have had to establish security measures, prompted pa ...

20 Learning methods to combine linguistic indicators: improving aspectual classification and revealing linguistic insights

Eric V. Siegel, Kathleen R. McKeown

December 2000 **Computational Linguistics**, Volume 26 Issue 4

Full text available: pdf(1.96 MB) Additional Information: full citation, abstract, references

Publisher Site

Aspectual classification maps verbs to a small set of primitive categories in order to reason about time. This classification is necessary for interpreting temporal modifiers and assessing temporal relationships, and is therefore a required component for many natural language applications.A verb's aspectual category can be predicted by co-occurrence frequencies between the verb and certain linguistic modifiers. These frequency measures, called linguistic indicators, are chosen by linguistic insi ...

Your search for **+"medical cost" +"training data" +rules** did not return any results.

You may want to try an Advanced Search for additional options.

Please review the Quick Tips below or for more information see the Search Tips.

Quick Tips

- Enter your search terms in lower case with a space between the terms.

  ```
  sales offices
  ```

  You can also enter a full question or concept in plain language.

  ```
  Where are the sales offices?
  ```

- Capitalize proper nouns to search for specific people, places, or products.

  ```
  John Colter, Netscape Navigator
  ```

- Enclose a phrase in double quotes to search for that exact phrase.

  ```
  "museum of natural history" "museum of modern art"
  ```

- Narrow your searches by using a + if a search term must appear on a page.

  ```
  museum +art
  ```

- Exclude pages by using a - if a search term must not appear on a page.

  ```
  museum -Paris
  ```

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

```
museum +"natural history" dinosaur -Chicago
```

1 Data clustering: a review

A. K. Jain, M. N. Murty, P. J. Flynn

September 1999 **ACM Computing Surveys (CSUR)**, Volume 31 Issue 3

Full text available: pdf(636.24 KB) Additional Information: full citation, abstract, references, citings, index terms, review

Clustering is the unsupervised classification of patterns (observations, data items, or feature vectors) into groups (clusters). The clustering problem has been addressed in many contexts and by researchers in many disciplines; this reflects its broad appeal and usefulness as one of the steps in exploratory data analysis. However, clustering is a difficult problem combinatorially, and differences in assumptions and contexts in different communities has made the transfer of useful generic co ...

3 Computational strategies for object recognition

Paul Suetens, Pascal Fua, Andrew J. Hanson

March 1992 **ACM Computing Surveys (CSUR)**, Volume 24 Issue 1

Additional Information:

Full text available: pdf(6.37 MB) full citation, abstract, references, citings, index terms, review

This article reviews the available methods for automated identification of objects in digital images. The techniques are classified into groups according to the nature of the computational strategy used. Four classes are proposed: (1) the simplest strategies, which work on data appropriate for feature vector classification, (2) methods that match models to symbolic data structures for situations involving reliable data and complex models, (3) approaches that fit models to the photometry and ...

7 Automated learning of decision rules for text categorization

Chidanand Apté, Fred Damerau, Sholom M. Weiss
July 1994 **ACM Transactions on Information Systems (TOIS)**, Volume 12 Issue 3

Full text available: pdf(1.28 MB) Additional Information: full citation, abstract, references, citings, index terms, review

We describe the results of extensive experiments using optimized rule-based induction methods on large document collections. The goal of these methods is to discover automatically classification patterns that can be used for general document categorization or personalized filtering of free text. Previous reports indicate that human-engineered rule-based systems, requiring many man-years of developmental efforts, have been successfully built to "read" documents and assign topics ...

8 Model-based recognition in robot vision
Roland T. Chin, Charles R. Dyer
March 1986 **ACM Computing Surveys (CSUR)**, Volume 18 Issue 1

Full text available: pdf(4.94 MB) Additional Information: full citation, abstract, references, citings, index terms, review

This paper presents a comparative study and survey of model-based object-recognition algorithms for robot vision. The goal of these algorithms is to recognize the identity, position, and orientation of randomly oriented industrial parts. In one form this is commonly referred to as the "bin-picking" problem, in which the parts to be recognized are presented in a jumbled bin. The paper is organized according to 2-D, 2½-D, and 3-D object representations, which are used as the basis for ...

10 An efficient boosting algorithm for combining preferences
Yoav Freund, Raj Iyer, Robert E. Schapire, Yoram Singer
December 2003 **The Journal of Machine Learning Research**, Volume 4

Full text available: pdf(392.20 KB) Additional Information: full citation, abstract, index terms

We study the problem of learning to accurately rank a set of objects by combining a given collection of ranking or preference functions. This problem of combining preferences arises in several applications, such as that of combining the results of different search engines, or the "collaborative-filtering" problem of ranking movies for a user based on the movie rankings provided by other users. In this work, we begin by presenting a formal framework for this general problem. We then describe and ...

19 Theory of keyblock-based image retrieval
April 2002 **ACM Transactions on Information Systems (TOIS)**, Volume 20 Issue 2

Full text available: pdf(2.14 MB) Additional Information: full citation, abstract, references, index terms, review

The success of text-based retrieval motivates us to investigate analogous techniques which can support the querying and browsing of image data. However, images differ significantly from text both syntactically and semantically in their mode of representing and expressing information. Thus, the generalization of information retrieval from the text domain to the image domain is non-trivial. This paper presents a framework for information retrieval in the image domain which supports content-based q ...

20 Hierarchical classification of Web content
Susan Dumais, Hao Chen
July 2000 **Proceedings of the 23rd annual international ACM SIGIR conference on Research and development in information retrieval**

Full text available: Additional Information: full citation, abstract, references, citings, index

pdf(1.16 MB) terms

This paper explores the use of hierarchical structure for classifying a large, heterogeneous collection of web content. The hierarchical structure is initially used to train different second-level classifiers. In the hierarchical case, a model is learned to distinguish a second-level category from other categories within the same top level. In the flat non-hierarchical case, a model distinguishes a second-level category from all other second-level categories. Scoring rules can further take ad ...

4 An efficient boosting algorithm for combining preferences

Yoav Freund, Raj Iyer, Robert E. Schapire, Yoram Singer

December 2003 **The Journal of Machine Learning Research**, Volume 4

Full text available: pdf(392.20 KB) Additional Information: full citation, abstract, index terms

We study the problem of learning to accurately rank a set of objects by combining a given collection of ranking or preference functions. This problem of combining preferences arises in several applications, such as that of combining the results of different search engines, or the "collaborative-filtering" problem of ranking movies for a user based on the movie rankings provided by other users. In this work, we begin by presenting a formal framework for this general problem. We then describe and ...

5 Face recognition: A literature survey

W. Zhao, R. Chellappa, P. J. Phillips, A. Rosenfeld
December 2003 **ACM Computing Surveys (CSUR)**, Volume 35 Issue 4

Full text available: pdf(4.28 MB) Additional Information: full citation, abstract, references, index terms

As one of the most successful applications of image analysis and understanding, face recognition has recently received significant attention, especially during the past several years. At least two reasons account for this trend: the first is the wide range of commercial and law enforcement applications, and the second is the availability of feasible technologies after 30 years of research. Even though current machine recognition systems have reached a certain level of maturity, their success is ...

June 1980 **ACM Computing Surveys (CSUR)**, Volume 12 Issue 2

Full text available: pdf(3.83 MB) Additional Information: full citation, references, citings, index terms

8 Data clustering: a review

A. K. Jain, M. N. Murty, P. J. Flynn
September 1999 **ACM Computing Surveys (CSUR)**, Volume 31 Issue 3

Full text available: pdf(636.24 KB) Additional Information: full citation, abstract, references, citings, index terms, review

Clustering is the unsupervised classification of patterns (observations, data items, or feature vectors) into groups (clusters). The clustering problem has been addressed in many contexts and by researchers in many disciplines; this reflects its broad appeal and usefulness as one of the steps in exploratory data analysis. However, clustering is a difficult

problem combinatorially, and differences in assumptions and contexts in different communities has made the transfer of useful generic co ...

Keywords: cluster analysis, clustering applications, exploratory data analysis, incremental clustering, similarity indices, unsupervised learning

9 Fast detection of communication patterns in distributed executions

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Full text available: pdf(4.21 MB) Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

10 Model selection via the AUC

Saharon Rosset

July 2004 **Twenty-first international conference on Machine learning**

Full text available: pdf(237.64 KB) Additional Information: full citation, abstract, references

We present a statistical analysis of the AUC as an evaluation criterion for classification scoring models. First, we consider significance tests for the difference between AUC scores of two algorithms on the same test set. We derive exact moments under simplifying assumptions and use them to examine approximate practical methods from the literature. We then compare AUC to empirical misclassification error when the prediction goal is to *minimize future error rate.* We show that the AUC may ...

11 A review of vessel extraction techniques and algorithms

Cemil Kirbas, Francis Quek

June 2004 **ACM Computing Surveys (CSUR)**, Volume 36 Issue 2

Full text available: pdf(8.06 MB) Additional Information: full citation, abstract, references, index terms

Vessel segmentation algorithms are the critical components of circulatory blood vessel analysis systems. We present a survey of vessel extraction techniques and algorithms. We put the various vessel extraction approaches and techniques in perspective by means of a classification of the existing research. While we have mainly targeted the extraction of blood vessels, neurosvascular structure in particular, we have also reviewed some of the segmentation methods for the tubular objects that show ...

Keywords: Magnetic resonance angiography, X-ray angiography, medical imaging, neurovascular, vessel extraction

12 Computational strategies for object recognition

Paul Suetens, Pascal Fua, Andrew J. Hanson

March 1992 **ACM Computing Surveys (CSUR)**, Volume 24 Issue 1

Full text available: pdf(6.37 MB) Additional Information: full citation, abstract, references, citings, index terms, review

This article reviews the available methods for automated identification of objects in digital images. The techniques are classified into groups according to the nature of the

computational strategy used. Four classes are proposed: (1) the simplest strategies, which work on data appropriate for feature vector classification, (2) methods that match models to symbolic data structures for situations involving reliable data and complex models, (3) approaches that fit models to the photometry and ...

Keywords: image understanding, model-based vision, object recognition

13 Class prediction and discovery using gene expression data

Donna K. Slonim, Pablo Tamayo, Jill P. Mesirov, Todd R. Golub, Eric S. Lander

April 2000 **Proceedings of the fourth annual international conference on Computational molecular biology**

Full text available: pdf(858.00 KB) Additional Information: full citation, abstract, references, citings

Classification of patient samples is a crucial aspect of cancer diagnosis and treatment. We present a method for classifying samples by computational analysis of gene expression data. We consider the classification problem in two parts: *class discovery* and *class prediction*. Class discovery refers to the process of dividing samples into reproducible classes that have similar behavior or properties, while class prediction places new samples into already known classes. We describe ...

14 Multi Relational Data Mining (MRDM): Multi-relational data mining: an introduction

Sašo Džeroski

July 2003 **ACM SIGKDD Explorations Newsletter**, Volume 5 Issue 1

Full text available: pdf(1.71 MB) Additional Information: full citation, abstract, references, citings

Data mining algorithms look for patterns in data. While most existing data mining approaches look for patterns in a single data table, multi-relational data mining (MRDM) approaches look for patterns that involve multiple tables (relations) from a relational database. In recent years, the most common types of patterns and approaches considered in data mining have been extended to the multi-relational case and MRDM now encompasses multi-relational (MR) association rule discovery, MR decision tree ...

Keywords: inductive logic programming, multi-relational data mining, relational association rules, relational data mining, relational decision trees, relational distance-based methods

15 Non-programmed computation

Derek Partridge

16 Efficient multilingual phoneme-to-grapheme conversion based on HMM

Panagiotis A. Rentzepopoulos, George K. Kokkinakis

September 1996 **Computational Linguistics**, Volume 22 Issue 3

Full text available: pdf(1.41 MB) Additional Information: full citation, abstract, references

Publisher Site

Grapheme-to-phoneme conversion (GTPC) has been achieved in most European languages by dictionary look-up or using rules. The application of these methods, however, in the reverse process, (i.e., in phoneme-to-grapheme conversion [PTGC]) creates serious problems, especially in inflectionally rich languages. In this paper the PTGC problem is approached from a completely different point of view. Instead of rules or a dictionary, the statistics of language connecting pronunciation to spelling are ex ...

17 A survey of image registration techniques

Lisa Gottesfeld Brown

December 1992 **ACM Computing Surveys (CSUR)**, Volume 24 Issue 4

Full text available: pdf(5.20 MB) Additional Information: full citation, abstract, references, citings, index terms, review

Registration is a fundamental task in image processing used to match two or more pictures taken, for example, at different times, from different sensors, or from different viewpoints. Virtually all large systems which evaluate images require the registration of images, or a closely related operation, as an intermediate step. Specific examples of systems where image registration is a significant component include matching a target with a real-time image of a scene for target recognition, mon ...

Keywords: image registration, image warping, rectification, template matching

18 Tissue classification with gene expression profiles

Amir Ben-Dor, Laurakay Bruhn, Nir Friedman, Iftach Nachman, Michèl Schummer, Zohar Yakhini

April 2000 **Proceedings of the fourth annual international conference on Computational molecular biology**

Full text available: pdf(1.11 MB) Additional Information: full citation, abstract, references, citings

Constantly improving gene expression profiling technologies are expected to provide understanding and insight into cancer related cellular processes. Gene expression data is also expected to significantly and in the development of efficient cancer diagnosis and classification platforms. In this work we examine two sets of gene expression data measured across sets of tumor and normal clinical samples One set consists of 2,000 genes, measured in 62 epithelial colon samples [1]. The second consi ...

19 Efficient reasoning

Russell Greiner, Christian Darken, N. Iwan Santoso

March 2001 **ACM Computing Surveys (CSUR)**, Volume 33 Issue 1

Full text available: pdf(445.41 KB) Additional Information: full citation, abstract, references, citings, index terms, review

Many tasks require "reasoning"—i.e., deriving conclusions from a corpus of explicitly stored information—to solve their range of problems. An ideal reasoning system would produce all-and-only the correct answers to every possible query, produce answers that are as specific as possible, be expressive enough to permit any possible fact to be stored and any possible query to be asked, and be (time) efficient

Keywords: efficiency trade-offs, soundness/completeness/expressibility

20 Extracting predicates from mining models for efficient query evaluation

Surajit Chaudhuri, Vivek Narasayya, Sunita Sarawagi

September 2004 **ACM Transactions on Database Systems (TODS)**, Volume 29 Issue 3

Full text available: pdf(698.37 KB) Additional Information: full citation, abstract, references, index terms

Modern relational database systems are beginning to support ad hoc queries on mining models. In this article, we explore novel techniques for optimizing queries that contain predicates on the results of application of mining models to relational data. For such queries, we use the internal structure of the mining model to automatically derive traditional database predicates. We present algorithms for deriving such predicates for a large class of popular discrete mining models: decision trees, nai ...

2 Machine learning in automated text categorization

Fabrizio Sebastiani

March 2002 **ACM Computing Surveys (CSUR)**, Volume 34 Issue 1

Full text available: pdf(524.41 KB) Additional Information: full citation, abstract, references, citings, index terms

The automated categorization (or classification) of texts into predefined categories has witnessed a booming interest in the last 10 years, due to the increased availability of documents in digital form and the ensuing need to organize them. In the research community the dominant approach to this problem is based on machine learning techniques: a general inductive process automatically builds a classifier by learning, from a set of preclassified documents, the characteristics of the categories. ...

13 Model selection via the AUC
Saharon Rosset
July 2004 **Twenty-first international conference on Machine learning**
Full text available: pdf(237.64 KB) Additional Information: full citation, abstract, references

We present a statistical analysis of the AUC as an evaluation criterion for classification scoring models. First, we consider significance tests for the difference between AUC scores of two algorithms on the same test set. We derive exact moments under simplifying assumptions and use them to examine approximate practical methods from the literature. We then compare AUC to empirical misclassification error when the prediction goal is to *minimize future error rate.* We show that the AUC may ...

14 A survey of methods for recovering quadrics in triangle meshes
Sylvain Petitjean
June 2002 **ACM Computing Surveys (CSUR)**, Volume 34 Issue 2
Full text available: pdf(3.91 MB) Additional Information: full citation, abstract, references, citings, index terms

In a variety of practical situations such as reverse engineering of boundary representation from depth maps of scanned objects, range data analysis, model-based recognition and algebraic surface design, there is a need to recover the shape of visible surfaces of a dense 3D point set. In particular, it is desirable to identify and fit simple surfaces of known type wherever these are in reasonable agreement with the data. We are interested in the class of quadric surfaces, that is, algebraic surfa ...

15 Class prediction and discovery using gene expression data
Donna K. Slonim, Pablo Tamayo, Jill P. Mesirov, Todd R. Golub, Eric S. Lander
April 2000 **Proceedings of the fourth annual international conference on Computational molecular biology**
Full text available: pdf(858.00 KB) Additional Information: full citation, abstract, references, citings

Classification of patient samples is a crucial aspect of cancer diagnosis and treatment. We present a method for classifying samples by computational analysis of gene expression data. We consider the classification problem in two parts: *class discovery* and *class prediction*. Class discovery refers to the process of dividing samples into reproducible classes that have similar behavior or properties, while class prediction places new samples into already known classes. We describe ...

16 Tissue classification with gene expression profiles
Amir Ben-Dor, Laurakay Bruhn, Nir Friedman, Iftach Nachman, Michèl Schummer, Zohar Yakhini
April 2000 **Proceedings of the fourth annual international conference on Computational molecular biology**
Full text available: pdf(1.11 MB) Additional Information: full citation, abstract, references, citings

Constantly improving gene expression profiling technologies are expected to provide understanding and insight into cancer related cellular processes. Gene expression data is also expected to significantly and in the development of efficient cancer diagnosis and classification platforms. In this work we examine two sets of gene expression data measured across sets of tumor and normal clinical samples One set consists of 2,000 genes, measured in 62 epithelial colon samples [1]. The second consi ...

18 Evaluating collaborative filtering recommender systems

Jonathan L. Herlocker, Joseph A. Konstan, Loren G. Terveen, John T. Riedl
January 2004 **ACM Transactions on Information Systems (TOIS)**, Volume 22 Issue 1

Full text available: pdf(253.92 KB) Additional Information: full citation, abstract, references, index terms

Recommender systems have been evaluated in many, often incomparable, ways. In this article, we review the key decisions in evaluating collaborative filtering recommender systems: the user tasks being evaluated, the types of analysis and datasets being used, the ways in which prediction quality is measured, the evaluation of prediction attributes other than quality, and the user-based evaluation of the system as a whole. In addition to reviewing the evaluation strategies used by prior researchers ...

19 Discovering models of software processes from event-based data

Jonathan E. Cook, Alexander L. Wolf
July 1998 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volume 7 Issue 3

Full text available: pdf(369.76 KB) Additional Information: full citation, abstract, references, citings, index terms, review

Many software process methods and tools presuppose the existence of a formal model of a process. Unfortunately, developing a formal model for an on-going, complex process can be difficult, costly, and error prone. This presents a practical barrier to the adoption of process technologies, which would be lowered by automated assistance in creating formal models. To this end, we have developed a data analysis technique that we term process discovery. Under this technique, data ...

2 Face recognition: A literature survey

W. Zhao, R. Chellappa, P. J. Phillips, A. Rosenfeld

December 2003 **ACM Computing Surveys (CSUR)**, Volume 35 Issue 4

Full text available: pdf(4.28 MB) Additional Information: full citation, abstract, references, index terms

As one of the most successful applications of image analysis and understanding, face recognition h recently received significant attention, especially during the past several years. At least two reaso account for this trend: the first is the wide range of commercial and law enforcement applications, the second is the availability of feasible technologies after 30 years of research. Even though curre machine recognition systems have reached a certain level of maturity, their success is ...

Fabrizio Sebastiani

March 2002 **ACM Computing Surveys (CSUR)**, Volume 34 Issue 1

Full text available: pdf(524.41 KB) Additional Information: full citation, abstract, references, citings, index terms

The automated categorization (or classification) of texts into predefined categories has witnessed booming interest in the last 10 years, due to the increased availability of documents in digital form the ensuing need to organize them. In the research community the dominant approach to this pro is based on machine learning techniques: a general inductive process automatically builds a classi learning, from a set of preclassified documents, the characteristics of the categories. ...

4 Fast detection of communication patterns in distributed executions

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Full text available: pdf(4.21 MB) Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on proce time diagrams are often used to obtain a better understanding of the execution of the application. visualization tool we use is Poet, an event tracer developed at the University of Waterloo. Howeve these diagrams are often very complex and do not provide the user with the desired overview of t application. In our experience, such tools display repeated occurrences of non-trivial commun ...

5 An efficient boosting algorithm for combining preferences

Yoav Freund, Raj Iyer, Robert E. Schapire, Yoram Singer

December 2003 **The Journal of Machine Learning Research**, Volume 4

Full text available: pdf(392.20 KB) Additional Information: full citation, abstract, index terms

We study the problem of learning to accurately rank a set of objects by combining a given collecti ranking or preference functions. This problem of combining preferences arises in several applicatic such as that of combining the results of different search engines, or the "collaborative-filtering" pr of ranking movies for a user based on the movie rankings provided by other users. In this work, w begin by presenting a formal framework for this general problem. We then describe and ...

Pat Langley, Herbert A. Simon

November 1995 **Communications of the ACM**, Volume 38 Issue 11

Full text available: pdf(554.28 KB) Additional Information: full citation, abstract, references, citings, index terms,

Machine learning is the study of computational methods for improving performance by mechanizin acquisition of knowledge from experience. Expert performance requires much domain-specific knowledge, and knowledge engineering has produced hundreds of AI expert systems that are now regularly in industry. Machine learning aims to provide increasing levels of automation in the know engineering process, replacing much time-consuming human activity with automatic tec ...

9 A survey of image registration techniques

Lisa Gottesfeld Brown

December 1992 **ACM Computing Surveys (CSUR)**, Volume 24 Issue 4

Full text available: pdf(5.20 MB) Additional Information: full citation, abstract, references, citings, index terms,

Registration is a fundamental task in image processing used to match two or more pictures taken,

example, at different times, from different sensors, or from different viewpoints. Virtually all large systems which evaluate images require the registration of images, or a closely related operation, a intermediate step. Specific examples of systems where image registration is a significant compone include matching a target with a real-time image of a scene for target recognition, mon ...

11 Multi Relational Data Mining (MRDM): Multi-relational data mining: an introduction
Sašo Džeroski
July 2003 **ACM SIGKDD Explorations Newsletter**, Volume 5 Issue 1

Full text available: pdf(1.71 MB) Additional Information: full citation, abstract, references, citings

Data mining algorithms look for patterns in data. While most existing data mining approaches look patterns in a single data table, multi-relational data mining (MRDM) approaches look for patterns t involve multiple tables (relations) from a relational database. In recent years, the most common t of patterns and approaches considered in data mining have been extended to the multi-relational and MRDM now encompasses multi-relational (MR) association rule discovery, MR decision tree ...
